

White Masterbatches

White masterbatches are based on rutile coated Titanium Dioxide (TiO₂) finely dispersed in a polymer carrier. They offer high opacity and easy processing.

Our range includes white masterbatches with various additives such as PPA (polymer processing aid), slip, anti-static, anti-split and UV-stabilizers.

-  Product range of white masterbatches
-  White masterbatches for thermoforming applications
-  Economic range of white masterbatches
-  White masterbatches used in PET milk bottles

Other Products

Color masterbatches

White masterbatches

Black masterbatches

UV-stabilizer masterbatches

Additive masterbatches

Filler masterbatches

Garden furniture compounds

Masterbatches for PVC cables

Masterbatches for synthetic fibers

Tailor-made multi-functional masterbatches

Single pigment concentrates

Masterbatches for PLA

Photo-Oxo degradable masterbatches

Biodegradable compounds

STATE OF THE ART PRODUCTION TECHNOLOGY

Special twin screw compounders

Lean manufacturing

Standardized production processes

Automatic processes

Local service, Global presence
